

A3

Still another aspect of the present invention is a receiving control device, wherein said obtained program information includes at least broadcast channel number, broadcast start time and broadcast end time.

At page ~~6~~, lines 10-12:

A4

Yet another aspect of the present invention is a receiving control device, wherein said retrieval means retrieves program information to obtain a program relating to said keyword.

At page ~~6~~, lines 15-17:

A5

Still yet another aspect of the present invention is a receiving control device, wherein

At page ~~7~~, lines 2-3:

A6

A further aspect of the present invention is a receiving control device, further comprising video recording medium control means of operating a recording medium for recording video information, wherein

At page ~~7~~, lines 17-19:

A7

A still further aspect of the present invention is a receiving control device, wherein said keyword input means inputs said keywords from a keyword server connected to said network and used to transmit said keywords.

At page ~~7~~, lines 22-23:

A8

A yet still further aspect of the present invention is a receiving control device, wherein

At page ~~8~~, lines 4-6:

A still yet further aspect of the present invention is a receiving control device, further comprising program information change monitoring means

could .  
for carrying out monitoring as to whether program information stored in said program information server is renewed or not, wherein

At page 8, lines 17-18:

A10  
An additional further aspect of the present invention is a receiving control device, wherein said detection is carried out by making inquiries to said program information server at predetermined time intervals as to the renewal time of said program information stored in said program information server.

At page 8, lines 23-25:

A11  
A still additional further aspect of the present invention is a receiving control device, further comprising an area information holding means of holding area information for specifying an area wherein said receiving control device itself is installed, wherein

At page 9, lines 10-12:

A12  
A yet still additional further aspect of the present invention is a receiving control device, further comprising a program information display means of displaying program information, wherein

At page 9, lines 24-25 and page 10, line 1:

A13  
A still yet further aspect of the present invention is a receiving control device, wherein said program information server has the function of said keyword server.

At page 10, lines 3 and lines 6-7:

A14  
A supplementary aspect of the present invention is a medium having programs and/or data for activating all or part of functions of all or part of means of said receiving control device on a computer, wherein said medium can be processed by a computer.
